PROFESSIONAL SUMMARY

AI & Data Science undergraduate specializing in AI Agents, Agentic Workflows, LLM Integration, RAG Pipelines, WhatsApp Automation, Full-Stack Development, Automation Engineering, and SaaS Systems. Co-Founder of Nexa Tech, building AI-powered business automation solutions using Python, n8n, Supabase, OpenAI, Gemini, and Meta WhatsApp APIs. Experienced in developing production-oriented automation systems, AI assistants, CRM platforms, semantic search solutions, and developer tools. Seeking internships in Artificial Intelligence, Machine Learning, Agent Engineering, Full-Stack Development, and Developer Tools.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

Sanjay Ghodawat University (NIAT), Kolhapur | Aug 2025 – Present
CGPA: 8.7 / 10

EXPERIENCE

Co-Founder | Nexa Tech | 2025 – Present

- Building AI-powered automation systems, AI agents, CRM solutions, and WhatsApp-based workflows for businesses.
- Designing multi-tenant SaaS architecture using Supabase, PostgreSQL, n8n, APIs, and cloud deployments.
- Working with LLMs, retrieval systems, workflow orchestration, and business process automation.

President | ADSA (AI & Data Science Student Association) | 2025 – Present

- Leading technical initiatives, hackathons, podcasts, workshops, and AI-focused community events.
- Organized OpenAI-focused hackathons and developer engagement activities.
- Collaborated with industry professionals for technical talks and career guidance sessions.

PROJECTS

Kisan Mitr AI | AI, IoT, Python

AI-powered farming assistant for crop health monitoring, environmental analysis, and agricultural recommendations.

WA CRM | WhatsApp Automation, Supabase, n8n, Gemini, Meta API

CRM and automation platform featuring AI reservation agents, workflow automation, and business messaging.

ANYA CLI | Python, CLI, Developer Tools (Open Source, In Progress)

Terminal-native AI companion focused on productivity, automation, extensibility, and developer workflows.

Semantic Search & RAG Pipeline | LangChain, Embeddings, Vector Search

Built intelligent document retrieval and question-answering systems using retrieval augmented generation.

LinkedIn Content Automation Pipeline | Gemini API, n8n, Automation

Automated content generation, approval workflows, analytics tracking, and publishing pipelines.

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript, C++, SQL

Frontend: React, Next.js, Tailwind CSS, HTML5, CSS3, Responsive Design

AI & Machine Learning: AI Agents, Agentic Workflows, LLM Integration, Prompt Engineering, RAG, Semantic Search, Vector Databases, Embeddings

Automation: n8n, Workflow Automation, WhatsApp Automation, API Integration, Business Process Automation

Databases: PostgreSQL, Supabase, SQL, Vector Stores

Cloud & DevOps: Docker, Railway, Netlify, Vercel, Linux, Ubuntu, Git, GitHub

Tools: Cursor, Claude Code, OpenCode CLI, VS Code

Models & APIs: OpenAI, Gemini, Claude, DeepSeek, Sarvam AI, Meta WhatsApp Business API

ACHIEVEMENTS

- Ideathon – 1st Place Winner (Project Solvix)
- Smart India Hackathon (SIH) – Cleared Multiple Rounds
- Makers Conclave 2026 – Kisan Mitr AI
- NASA Space Apps Challenge – Participant
- President, ADSA – AI & Data Science Student Association
